CERDI is organizing a workshop on Cliometrics and Economic Development with the [Cliometrics and Complexity research team](#)(http://www.ixxi.fr/recherche/cliometrie-et-complexite?set_language=en&cl=en).

The CAC's research project led by Antoine Parent aims at developing the analysis of time-series data in economics.

Antoine Parent will open the workshop with a talk on « *The network characteristics of world equity markets over the past half-century* ».

Others speakers will present their work on several economic development issues from a cliometric perspective.
