Complément date

Room Pascal 313 RO, 26 avenue Léon Blum 63000 Clermont-Ferrand

CERDI is organizing a workshop on Cliometrics and Economic Development with the [Cliometrics and Complexity research team](#). The CAC's research project led by Antoine Parent aims at developing the analysis of time-series data in economics.

Antoine Parent will open the workshop with a talk on « *The network characteristics of world equity markets over the past half-century* ».

Others speakers will present their work on several economic development issues from a cliometric perspective.
